(54) Title: ATHLETICS SHOE

(57) Abstract: The application relates to a sole (20) for footwear (10) which has a toe part (70) being made of a substantially inflexible material, a ball part (80) being made of a flexible material, and an instep-heel part (90) being made of a substantially inflexible material. In the preferred embodiment of the invention, the substantially inflexible material is carbon fibre in a thermoplastic epoxy resin and the flexible material of an aramide fibre in a thermoplastic epoxy resin. The application also teaches a shoe made with this sole and a method for the manufacture of the shoe.
